radioSURG® 2200

Dear Mrs. Meyer-Haake,

it is a pleasure for me to give to you a reference letter concerning the radio surgical unit **radioSURG® 2200**, manufactured by Meyer-Haake Medical Innovations, Am Joseph 9, 61273 Wehrheim, Germany, because I have made excellent experiences with the **radioSURG® 2200**.

During the last year I have performed in my practice numerous tissue excisions with the **radioSURG® 2200**.

I have been more than satisfied with the operating mode of the radio surgical unit during all tissue excisions.
The handling was real easy. The results – especially the histological ones have convinced me.

The edges of the resection have shown, with the right setting of the unit, none necrotic or carbonized zones.

The extracted tissue parts could have been evaluated from the pathologist till the edges of the amputation which is very important in particular with precancerosis and malignant changes.

With best regards

Ralf Dzingel, MD
